## INFOMAG

**September  
2018**

## **Editor's View**

**If you are not willing to learn, no one can help you. If you are determined to learn, no one can stop you.**

This September-2018 edition is dedicated to our beloved teachers who have brought us to the stage we currently are. The role they play in shaping our lives our thoughts, and our behaviour cannot be expressed in words. A teacher not only enhances academic knowledge but also makes us a better human being. It is the only profession where a person is happier and proud when his/her student achieves more than him. Most of us are blessed with great teachers in our life. We have strong faith in our teachers that habitually we prefer to take a final view before starting anything. Unfortunately, many of us have lost the link with our teachers as we started our professional careers. It's a time for us to call them and thank them for all the good they have done for us.

September 5, is celebrated as teachers' day as we fondly remember our former President Shri Sarvepalli Radhakrishnan and At the outset, Cf Infomag wishes all the teachers a very Happy Teachers' Day!

# Cf 5<sup>th</sup> September

Sarvepalli Radhakrishnan (5 September 1888 – 17 April 1975) was born in a Telugu-speaking Niyogi Brahmin family, in Tiruttani in Madras Presidency. He was an Indian philosopher and statesman who was the first Vice President of India and the second President of India .

Radhakrishnan studied philosophy by chance rather than choice. Being a financially constrained student, when a cousin who graduated from the same college passed on his philosophy textbooks into Radhakrishnan, it automatically decided his academic course.

One of India's most distinguished twentieth-century scholars of comparative religion and philosophy. He has been influential in shaping the understanding of Hinduism, in both India and the west, and earned a reputation as a bridge-builder between India and the West.

Radhakrishnan was awarded several high awards during his life, including a knighthood in 1931, the Bharat Ratna, the highest civilian award in India, in 1954, and honorary membership of the British Royal Order of Merit in 1963.

When he became the President of India, some of his students and friends requested him to allow them to celebrate his birthday, on 5 September. He replied, Instead of celebrating my birthday, it would be my proud privilege if September 5th is observed as Teachers' Day. His birthday has since been celebrated as Teachers' Day in India. Radhakrishnan believed that "teachers should be the best minds in the country"

## Out of the Box Thinking: Why? – Part 2

*“Push harder than yesterday, if you want a different tomorrow”*

### Why think out of the box?

(a) It keeps our brain sharp: Out of the box thinking helps us become creative and gives us an edge over others when it comes to analyzing a challenge.

(b) Miraculous solution for complex issue: A seemingly complex, unsolvable problem becomes easy for an outside the box thinker.

(c) Extraordinary and smart: It adds “extra” to the ordinary and the result is extraordinary

(d) Excellence: The ability to find a solution for everything makes us excel in life. This decisiveness helps us climb the ladder of success.

(e) Competitive environment: In this ever changing, fast developing world, there exists a lot of competition and hence thinking out of the box makes us competitive and helps us win.

### Tenali Rama Catches the Thieves

A few thieves had entered Vijayanagara and the chief of the police (Kotwal) was worried since there was a string of robberies taking place in the city.

Tenali Rama asked his wife to spread news about the riches they had. As the news spread, even the thieves came to know about it. One of the thieves also joined for work in Tenali Rama's house so that he could spy on Rama. That night, Rama and his wife were talking about the riches and decided to throw it into their well to keep it safe from the thieves.

They threw a big wooden box with a huge lock into the well. The thief overheard this and informed his friends. All the thieves broke into Tenali Rama's garden where the well was and started drawing water from the well so that they could easily take the box. While they were busy drawing water, Rama was making a path for the water towards the plants. Working for hours drawing water, the robbers got exhausted. Just then, they heard someone shout, "Enough! All the plants have enough water. Don't waste it".

*"While the optimist and pessimist were fighting over a glass of water, the opportunist drank it!!!"*

### **SPC Message:**

*"Talk to yourself once a day. Otherwise you may miss a meeting with an EXCELLENT person in this world"*

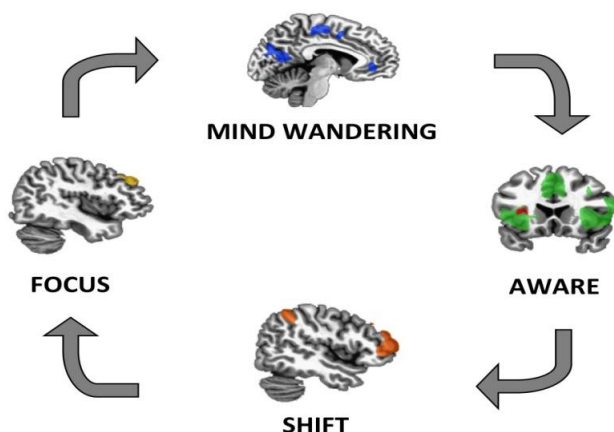

*– Swami Vivekananda*

## Mantra 8: The Present Is the God's Greatest 'Present'

❖ The mind often wanders back to events of the past, or to dreams about the future. Thus, one forgets to live in the present, which is the only opportunity to make things happen.

❖ To remain in the present, always keep calm. Whenever you feel agitated, take a few deep breaths and bring your thoughts in order.

❖ Sachin Tendulkar said to young students during one of the 'Mann Ki Baat' episode: 'When you play cricket, do you think about the ball you faced in the past? Or the ball you will see in the future? Or do you concentrate on the ball you are about to face in that moment alone? If you keep thinking about the previous ball or the next ball, how will you hit the ball which is thrown at you now?

# Cf Knowledge Sharing Stop

## **Word of the month: Rendezvous**

**Meaning**-a place where people have arranged to meet  
-to meet at an agreed time and place

**Example**-He didn't recognize the address of the rendezvous.  
The Cf rendezvous is at Lalbagh.

## **Fruit of the month: - Sweet Tamarind**

The sweet tamarind fruit grows atop extremely tall trees of the 'fabaceae family' (the family that includes peas and other legumes). It is indigenous to tropical Africa. The cultivation of tamarind has now spread to most of the warmer, drier regions of Mexico and Asia, including India and Sri Lanka. Few Benefits are-

- Boost immune system
- Works as a cleansing agent
- Improves blood circulation
- Improves nerve function

## **Plant of the month: Peace Lily**

The Peace Lily is a beautiful plant and one that can improve your indoor air quality by as much as 60 percent. It helps to reduce the levels of mold spores that grow in the home by absorbing those spores through its leaves and then circulating them to the plant's roots where they are used as food. In bathrooms, the Peace Lily can help to keep shower tiles and curtains free from mildew.

## Concept: Scrambling

This refers to a digital encoding technique that is used to achieve the deliberate distortion of digital signals in order to prevent an unauthorized reception. This is achieved through the use of a device called scrambler or randomizer. Scrambling helps telecommunication service providers to offer their services only to customers who are willing to pay, thus helping sustain their business model. This helps prevent the theft of digital signals.

## App: Alarmy(Sleep if you can)

World's Most Annoying alarm clock app. Features "Photo Mode" (Get out of bed and take a picture of registered place to turn off alarm clock) . Also support "Math problem mode" (To turn off alarm clock, solve the math problem) and "Shake Mode" (To turn off alarm clock, shake your phone). Includes super annoying loud alarms that force you out from your sleep. This is the innovative solution for those who just can't seem to get up on time.

## Did you know?

What does color squares on toothpaste tube means-

Cardinal Rule

The tools used in manufacturing today have multiplied greatly. It is no longer specialized steels or even ceramics which monopolize the cutting tool industry. It is hard to believe that lasers can be used to cut heavy steel plates as also for delicate eye surgery. Can you imagine that the plain water you use at home can be used to cut steel? Water pumped at high pressures and focused as a jet cuts cleanly.

To digress, anything focused, and focused sharply, becomes a good cutting edge or a welding source. A laser is a focused and coherent source of light. A waterjet is a sharply directed high-pressure jet. If we also, as a country and as a people, focus our efforts to eradicate poverty and to develop in a sustained manner, we don't think any obstacles could withstand the force of that collective, coherent, and focused will!
