Taught

Gita Gopinath is the First Deputy Managing Director of the International Monetary Fund (IMF) as of January 21, 2022. In that role, she oversees the work of staff, represents the Fund at multilateral forums, maintains high-level contacts with member governments and Board members, the media, and other institutions; leads the Fund’s work on surveillance and related policies, and oversees research and flagship publications.

Ms. Gopinath previously served as the Chief Economist of the Fund from 2019-22. In that role, she was the Economic Counsellor of the Fund and Director of its Research Department. She helmed thirteen releases of the World Economic Outlook, including forecasts of the impact of the COVID-19 pandemic on the global economy. She co-authored the “Pandemic Paper” on how to end the COVID-19 pandemic that set globally endorsed targets for vaccinating the world and led to the creation of the Multilateral Task Force made up of the leadership of the IMF, World Bank, WTO, and WHO to help end the pandemic and the establishment of a working group with vaccine manufacturers to identify trade barriers, supply bottlenecks, and accelerate delivery of vaccines to low and lower-middle income countries. She also worked with other Fund departments to connect with policymakers, academics, and other stakeholders on a new analytical approach to help countries respond to international capital flows via the Integrated Policy Framework. She also helped set up a climate change team inside the IMF to analyze, among other things, optimal climate mitigation policies.

Prior to joining the IMF, Ms. Gopinath was the John Zwaanstra Professor of International Studies and of Economics at Harvard University's economics department (2005-22), and before that she was an assistant professor of economics at the University of Chicago's Booth School of Business (2001-05). Her research, which focuses on International Finance and Macroeconomics, is widely cited and has been published in many top economics journals. She has authored numerous research articles on exchange rates, trade and investment, international financial crises, monetary policy, debt, and emerging market crises.

Ms. Gopinath was born in India and is a U.S. national and an overseas citizen of India. She has received numerous awards and commendations. In 2021, the Financial Times named her among the '25 most influential women of the year', the International Economic Association named her the Schumpeter-Haberler Distinguished Fellow, the Agricultural & Applied Economics Association recognized her with the John Kenneth Galbraith Award, and the Carnegie Corporation named her among 'Great (American) Immigrants'. She was named among the Bloomberg '50 people who defined 2019', a 'Top Global Thinker' by Foreign Policy, and among the 'Women who Broke Major Barriers to Become Firsts' by Time Magazine.

Ms. Gopinath is the recipient of the Pravasi Bharatiya Samman, the highest honor conferred on overseas Indians by the Government of India, and the Distinguished Alumnus Award from the University of Washington. The IMF named her one of the 'top 25 economists under 45' in 2014, she was chosen as one of the '25 Indians to Watch' by the Financial Times in 2012, and she was selected as a Young Global Leader by the World Economic Forum in 2011.

Ms. Gopinath received her Ph.D. in economics from Princeton University in 2001, after earning a B.A. from Lady Shri Ram College and M.A. degrees from the Delhi School of Economics and the University of Washington.

EXPERIENCE – 104%

***“Nothing ever becomes real till it is experienced”
– John Keats***

Experience cannot be explained; it can only be experienced !!!

Experience can be defined as “an event or occurrence which leaves an impression on someone”. In other words, it is the process of getting knowledge or skill from doing, seeing, or feeling things. Teaching is an experience; Learning is an experience; Dancing is an experience; Life itself is an Experience !!!

The question arises Whether knowledge is superior or Experience? The answer is crystal clear from the Matho – English concept we started from Jan 2022 – Knowledge has 96 % weightage (June 22 Article) whereas Experience exceeds Centum – 104 %.

No doubt, the Knowledge and Qualifications add to experience; but Experience is unmatched with anything !!

Experience the Experienced Quotes of Greats !!!

- ❖ “The only source of Knowledge is Experience” - Albert Einstein
- ❖ “Experience is a lesson of the past to lessen the burden of the future”- Michael Sage
- ❖ “Experience is what you get when you didn’t get what you wanted” - Randy Pausch
- ❖ “Go for it. No matter how it ends, it was an experience” - Anonymous
- ❖ “View life as a continuous learning experience” - Denis Waitley

Experience cannot be created; we must undergo the same. Every experience, good or bad, teaches amazing life lessons. Let’s learn from it and be successful in every field of Life !!!

***SPC Message :
Believe in yourself,
Push your limits,
Experience your goals, &
Be Happy !!!***

Nature gifted us all
with the essential elements,
but Humans are too ungenerous to use it all,
She never accused!

She had no demands,
Humans had all commands

She has the ethics of atonement,
Wherein Humans have the
foundation of self-securing.

She cares, Humans don't.
She cried; Humans still didn't bother.

Outbreak is "Human-Made"

Humans are suffering,
She is recovering.

It sounds easy, yet it is very powerful. A simple shift in mindset can create the prettiest smile on our faces. Life is made of moments, and every tiny thing counts. These little things will make up life's moments. Significant and big things are important to each of us, yet it is the little things that make each day. When someone says, "Little things matter," it does not imply that small things are the only things that matter and that big things have no real value. It varies from person to person. Therefore, what the saying implies is that if one doesn't do little things well, the big things don't happen. A little initiative will lead to a big achievement.

There are people who live solely for the big things in life, who are bored by the little things and pay no attention to them. They are waiting for big things to come, but chances are that they will never come, because the tiny things that make big things happen are not given attention. Telling someone "Thank you" or helping someone when it was not asked for will become a reason for somebody's little smile. It costs nothing to say please and thank you. But forgetting those magical words will cost you. A little hard work on a day-to-day basis will make a noticeable difference in our lives and will bring those two words "CA". Showing efficiency in every task we do will be a stepping stone towards the accomplishment of our dream. Life is what we make it, so we will concentrate on those little things that matter, so we will make it.

1. Merchant Banker does not offer services in regard to—
(A) Project appraisal
(B) Capital issue
(C) Project preparation
(D) Subscription to Equity shares
2. Who among the following does not have an insurable interest in fire insurance?
(A) A shop owner in the property of his customers
(B) A creditor in the property mortgaged with him
(C) A trustee in the property of the trust
(D) An insurance company in the property insured
3. Who is the author of the book, "The Winning Sixer," which was released recently?
(A) Anil Kumble
(B) Rahul David
(C) W.V.Raman
(D) Krishnamachari Srikanth
4. Who was recently appointed as the new Managing Director of the State Bank of India (SBI)?
(A) Challa Sreenivasulu Setty
(B) Rajnish kumar
(C) Atanu Kumar Das
(D) Sanjiv Chadha
5. What is the profession of Anoop Mishra, who has been in the news recently?
(A) Politician
(B) Army Major
(C) Sportsperson
(D) Musician

1. Book of the month- Leaders Eat Last: Why Some Teams Pull Together and Others Don't by Simon Sinek

Imagine a world where almost everyone wakes up inspired to go to work. This is not a crazy, idealised notion. In many successful organisations, great leaders are creating environments in which teams trust each other so deeply that they would put their lives on the line for each other. Yet other teams, no matter what incentives were offered, are doomed to infighting, fragmentation and failure. Why? Today's workplaces tend to be full of cynicism, paranoia and self-interest. But the best organisations foster trust and cooperation because their leaders build what Sinek calls a Circle of Safety. It separates the security inside the team from the challenges outside. He shows that leaders who are willing to eat last are rewarded with deeply loyal colleagues who will stop at nothing to advance their vision. It's amazing how well it works.

2. Word of the month: mano a mano

a direct confrontation or conflict; head-on competition; duel.

3. Concept of the month: Bazball

'Bazball' essentially means an aggressive approach towards scoring quick runs, even in Test cricket - a format which is traditionally much slower than its limited overs counterparts like ODIs and T20s and sees batters take a much more conservative approach.

4. Quite Interesting-Vedic Maths

Vedic Mathematics is a system of mathematics which was discovered by Indian mathematician Jagadguru Shri Bharathi Krishna Tirthaji in the period between A.D. 1911 and 1918 and published his findings in a Vedic Mathematics Book by Tirthaji Maharaj.

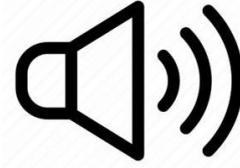

Vedic Mathematics is a collection of Techniques/Sutras to solve mathematical arithmetics in easy and faster way. It consists of 16 Sutras (Formulae) and 13 sub-sutras (Sub Formulae) which can be used for problems involved in arithmetic, algebra, geometry, calculus, conics.

Veda is a Sanskrit word which means 'Knowledge'. Using regular mathematical steps, solving problems sometimes are complex and time consuming. But using Vedic Mathematics General Techniques (applicable to all sets of given data) and Specific Techniques (applicable to specific sets of given data), numerical calculations can be done very fast.

Shri Bharathi Krishna Tirthaji Maharaj was born in March 1884 in the Puri village of Orissa state. He was very good in subjects like Mathematics, Science, Humanities and was excellent in Sanskrit language. He claims that these sutras/techniques he learnt from the Vedas especially 'Rig-Veda' directly or indirectly and he intuitively rediscovered them when he was practicing meditation for 8 years. Vedic Mathematics can definitely solve mathematical numerical calculations in faster way. Some Vedic Math Scholars mentioned that, using Vedic Maths tricks you can do calculations 10-15 times faster than our usual methods.

5. Gita For Life-Chapter 1 Arjuna Vishaadha Yoga(Verse 29-31)

न काङ्क्षे विजयं कृष्ण न च राज्यं सुखानि च ।
किं नो राज्येन गोविन्द किं भोगैर्जीवितेन वा ॥ 32॥
येषामर्थे काङ्क्षितं नो राज्यं भोगाः सुखानि च ।
त इमेऽवस्थिता युद्धे प्राणांस्त्यक्त्वा धनानि च ॥ 33॥

O Krishna, I do not desire victory, kingdom, or the happiness accruing to it. Of what avail will be a kingdom, pleasures, or even life itself, when the very persons for whom we covet them, are standing before us for battle?

6. Mankuthimmana Kagga

ತಳಮಳವಿದೇನಿಳಿಗೆ? ದೇವದನುಜರ್ ಮಧಿಸೆ |ಜಳನಿಧಿಯೊಳಾದಂತೆ ಸುಧೆಗೆ ಪೀರಿಕೆಯೇಂ?
||ಹಾಳಾಹಳಾವ ಕುಡಿವ ಗಿರಿಶನಿಧಿದೊಡೀ | ಕಳವಳವದೇತಕೆಯೇ? - ಮಂಕುತಿಮ್ಮ

Why are everyone on this earth so restless? It is similar to the restlessness among the Gods and Demons during the churning of the ocean when poison emanated as a produce. No one knew that it would be followed by elixir. So they did not know what to do with the poison. Luckily they had Lord Shiva to consume the posion and rescue the world. If we also know that there is such a person who will consume all our worries, then would we be still restless? - Mankutimma

7. Inspirational story-Wait...What?

A carpenter who was nearing retirement told his boss that he was ready to end his career and spend his time with his wife and family. He would miss his work, but he felt it was time to spend his time with the people who were important to him.

His boss was saddened by this news, as this carpenter had been a good, reliable employee for many years. He asked the carpenter if he could do him a favor and build just one more house.

The carpenter reluctantly conceded, even though his passion for building had faded. While he was building this last house, his normal work ethic faded and his efforts were mediocre, at best. He used inexpensive and inferior materials and cut corners wherever he could. It was a poor way to finish such a dedicated career that he once had.

When the carpenter was finished, his boss came to look at the house. He gave the key to the carpenter and said, "This house is my gift to you for all of the hard work you have done for me over the years." The carpenter was astonished.

What a generous gift this was to receive from his boss, but if he had known he was building a house for himself, he would have made his usual efforts to create a high-quality home.

The Moral:

The same idea applies to how you build your life. Every day that you wake up offers an opportunity for you to put your best foot forward, yet we often do mediocre work, saving the more important things for "another" day.

Then one day, we find ourselves shocked that our lives aren't what we had hoped they would be. The "house" we built to live in has a lot of flaws due to a lack of effort. However, you can't go back and rebuild it in a day or two.

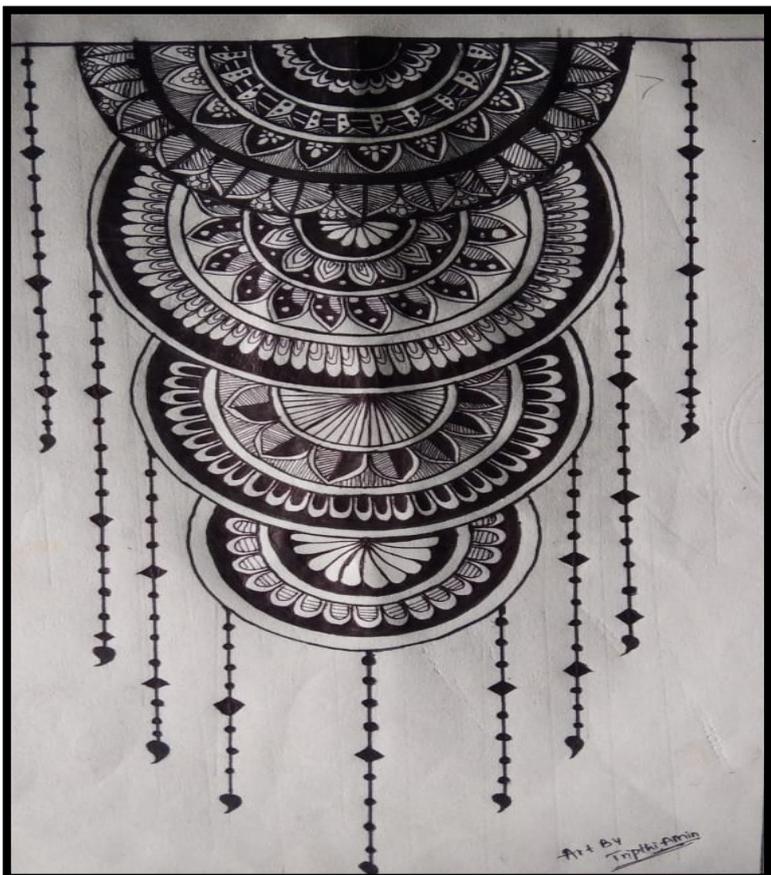

As people say, "Life is a do-it-yourself project." Your attitude and choices help build the life you will live tomorrow. So...build carefully.

An artist can show things that other people are terrified of expressing. This is an artwork of one of the greatest footballer Lionel Messi.
